

Managed Google Classrooms - Fully Supported
Quick Deployment - Expert Help

Unlock Instant Digital Learning

Introducing the Google Classroom Class Set

By adding a Google Classroom Class Set to your school's IT, you are providing teachers and pupils with access to the creative Google world, where they can build additional digital skills and enrich their edtech experience.

Simplify your IT and engage students instantly with our all-in-one Classroom Class Set. We provide 32 fully managed, pre-configured Chromebooks ready for immediate use.

Automatic MIS integration keeps class lists updated, while Magic Badges allow even the youngest pupils to log in independently. This package also includes five years of unlimited help desk support to keep your technology fast and secure.

Optional safeguarding tools like filtering and teacher management are available for extra protection. It's a complete, future-proof digital ecosystem built for classroom success.

Our 32 ClassGo package starts at less than **£395 per month for 5 years**

- Lenovo 2-in-1 11" Chromebook with stylus, managed
- Google Workspace fundamentals for education, configured
- Google Teaching and Learning upgrade for the teacher
- Wonde Edu sync and MyLogin
- All supported for 5 years

Our Support Service

Investing in technology shouldn't mean hiring an army of IT specialists. Our **Comprehensive Managed Service for Google for Education** gives your school a world-class digital learning environment, fully managed by us, and designed to be overseen by anyone on your team, with no technical background required.

Here is how we deliver maximum value with zero friction:

1. Unlimited Collaboration, Zero Boundaries

We unlock the full power of Google for Education to keep your school connected, organised, and collaborative.

- **Unlimited Emails:** to our help desk with problems for us to solve.
- **Video Meets:** pre-booked with our support team to help fix issues

2. 100% Remote Delivery = Maximum Savings

Because our service is delivered entirely in the cloud, we eliminate the need for expensive, on-site IT technicians and bulky physical hardware.

- **Lower Overhead:** We pass the savings directly to you, drastically reducing your annual IT budget.
- **Instant Support:** No waiting for a technician to drive to your campus. We configure, update, and troubleshoot your system remotely and instantly.

3. Designed for Non-IT Staff

You don't need an IT degree to work with us. We purposefully design our relationship management to be intuitive, jargon-free, and straightforward.

- **Your Dedicated Point of Contact:** Your designated school administrator (whether it's a secretary, business manager, or teacher) will have a direct line to our experts.
- **We Do the Heavy Lifting:** Want to add a new student, change a password, or adjust security settings? Your staff simply tells us what they need, and we execute it behind the scenes.
- **Plain-English Reporting:** We provide simple, clear updates on system health and usage without the confusing tech-speak.

The Bottom Line

We handle the complex infrastructure, security, and updates of the Google ecosystem. Your school gets a flawless, budget-friendly digital campus, and your staff can focus on what matters most: education.
